

STUDENT RESPONSE PAGE: BAT HEADS – THE POLLINATORS!

Select one bat species from the following list of pollinators: Mexican long-nose bat, Livingstone's fruit bat, and Jamaican flower bat.

The Bat Species we have chosen is: _____

Research and find pictures of your chosen bat species. Pay close attention to the bat's head and facial features. Note the bat's eyes, ears, mouth, nose, and tongue.

The key features we plan to add to our model are: _____

because _____

The most interesting feature about this bat species is: _____

Next, use the materials provided to create a model of the head, eyes, ears, face, nose, and tongue of your bat. Once completed dust or dip the bat face into the simulated pollen, then lightly pollinate the flower provided by your teacher.

Draw a sketch of your Bat Head Model:

STUDENT RESPONSE PAGE: BAT HEADS – THE POLLINATORS!

Lastly, write a reflection about what you did and learned about your bat.

What would you do differently to complete your model if there was time. What other materials would you use for your model? What were the strengths and weaknesses of your model? What were the strengths of your team? Was it successful?
